

PRELIMINARY RESULTS ON SDB WITH TRP

- N=12, Age = 53.4 ± 7.5 years
- 5 ♀ et 7 ♂
- BMI : 24.2±4.7
- OSA mild, moderate and severe
- PSG 1) before 2) with TRP (≈ 5.6 months of treatment)

- Average AHI reduction : 66.5 ± 20.5 %
- Reduction of OSA severity : 83% patients with AHI < 15 event/h
- No dropout cases reported
- Effects occur rapidly (shortest time to 50% reduction = 1.5 months)
